PROFILE

Six years designing and building early-stage products taught me that design isn't usability, it's all about de-risking value and shipping fast enough to see how people actually behave. Now I use AI to shorten that loop.

EXPERIENCE

Valoris · Proptech startup

Jul 2025 - present

Product Manager · Product Designer

Luxembourg

I lead product discovery and design on Valoris, improving the value proposition and market fit of a property-management SaaS.

- Pivoted the core flow from **web forms to chat interactions**: a Telegram AI assistant that turns user inputs and documents into structured data.
- Validated France as the primary market through Meta-ads campaigns, with a **CTR 4% higher** than Luxembourg.
- Built **custom Claude Code skills** that turn research insights into TDD specs and enforce design-system token compliance through linting.
- Increased onboarding **conversion 6%** using PostHog funnels and interviews.

SKILLS: Backlog management · Tracking plan · Data pipelines · Custom AI skills

TotalEnergies · Digital Factory

Jun 2022 - Jun 2025

Product Designer · Proxy Product Owner

Paris

I led research, design and build on 4 industrial SaaS, shipping MVPs fast and iterating through continuous discovery and usage tracking.

- Scaled an ML predictive-maintenance SaaS across 4 refineries (500+ inspectors): **82% daily active inspectors**, **-6% pipe leaks**.
- Redesigned the power-plant monitoring dashboard with ML-based kWh loss prediction: **+23% kWh tracked per operator**.
- Ran a **dual-track loop** in a small agile squad, discovering the next features while steering the build of the current ones into polished, shipped UI.
- Ran product discovery at scale: **70+ interviews** and **80+ usability tests**.

SKILLS: Story mapping · Adoption tracking · Data mapping · Design system

Avanade · Accenture-Microsoft JV

Jan 2020 - Jun 2022

Product Designer

Paris

I delivered on the full design scope, from user research to ideation and UI design, for BforBank, Sodexo, Chanel and Schneider Electric.

- Designed BforBank's mobile app onboarding (84 screens); the flow ranked **first of 51 banks** in Google's 2023 Finance UX benchmark.
- Co-designed Spie Batignolles' construction app (60 screens), connecting site crews to a complex ERP and replacing **3 legacy tools**.

REAL ESTATE EXPERTISE

Licensed Real Estate Professional

House of Training, Luxembourg

15-property family rental portfolio

Managed in France & Luxembourg
