Jonathan Schummers

Freelance Product Designer · Proptech & Fintech · Licensed Real
Estate Professional
Luxembourg

Résumé

I design SaaS products for real estate and finance

- Research — Find what users need before you build
- Product — Prioritize what to build first and why
- Design — Turn user needs into shippable interfaces

6 years in consulting, designing complex SaaS:

- TotalEnergies — Lead designer, 4 products from 0→1
- BforBank — Mobile banking app (#1 Google UX Benchmark)
- Spie Batignolles — SaaS for site crew tracking & procurement

My edge: deeply passionate about real estate and finance. I
manage a family rental portfolio and I'm building Valoris, a property
management tool. Licensed real estate professional in Luxembourg.

Open for freelance.

Expérience

freelance

Freelance Product Designer
juillet 2025 - Present (11 mois)
Luxembourg

Université Paris Cité

Intervenant / Lecturer

octobre 2023 - Present (2 ans 8 mois)
Paris, Île-de-France, France

- Teach a project-based User Research module with two other designers
- Mentor students through interviews, usability tests, data analysis & synthesis on a real product

- Leverage their research-focused master's to deepen UX research skills over UI craft

Avanade

Product Designer

janvier 2020 - juin 2025 (5 ans 6 mois)

Paris, Île-de-France, France

- Designed digital products for TotalEnergies, Spie Batignolles, Sodexo & BforBank
- Rapidly onboarded, grasping industry context and user goals
- Embedded in on-site agile squads; led discovery-to-launch cycles
- Shipped feature designs on time and within scope
- See role details below

TotalEnergies

Product Designer – Total Digital Factory

décembre 2021 - novembre 2024 (3 ans)

Paris, Île-de-France, France

- Founding Designer for 4 SaaS from concept to MVP, owning full design cycle
- Define with PM/PO product strategy based on user research
- Conducted 60+ interviews, created 11 personas, 9 user journeys & 70+ tests across multiple projects
- Launched scalable solutions across multiple sites and countries
- Worked in 4 Scrum squads with PMs & devs for daily collaboration
- Data-driven iterations post-MVP based on user analytics (Hotjar & Cloudwatch)
- Built dark-mode design system with ~20 components

Spie batignolles

UX/UI Designer

juillet 2020 - mai 2021 (11 mois)

Paris, Île-de-France, France

- Digitalised personnel and equipment tracking & procurement in one SaaS (desktop + mobile)
- Reduce procurement request time; auto-fill removed heavy manual data entry
- Re-shaped workflows via insights gathered from site crews
- Discovery phase: 12 interviews, 4 personas, 4 journeys, 12 usability tests
- Help to run co-creation and alignment workshops
- Delivered 60 desktop & 12 mobile screens with full specs and reusable components

IFSTTAR

User Researcher

janvier 2019 - juin 2019 (6 mois)

Région de Paris, France

Objective : Design and validate new transit-map formats for SNCF / RATP to improve passenger way-finding.

Key contributions

- Mapped user needs and pain points via surveys and interviews.
- Reviewed cognitive way-finding research to guide design choices.
- Produced 4 map concepts (each with test variants).
- Built the test protocol and ran 60+ usability sessions (quant + qual analyses).
- Delivered a concise report with actionable recommendations for easier navigation.

LIMSI

Chargé de recherche

janvier 2018 - avril 2018 (4 mois)

Orsay, France

Goal: Build a VR serious game that trains army medical team in leadership during mass-casualty events.

Key contributions

- Co-designed game scenarios simulating large-scale emergency care.
- Identified proactive vs. passive followership behaviours to embed in gameplay.
- Helped implement these behaviours in the game's virtual characters.
